Signal Processing in Radar Systems

Vyacheslav Tuzlukov

Signal Processing in Radar Systems Vyacheslav Tuzlukov

An essential task in radar systems is to find an appropriate solution to the problems related to robust signal processing and the definition of signal parameters. **Signal Processing in Radar Systems** addresses robust signal processing problems in complex radar systems and digital signal processing subsystems. It also tackles the important issue of defining signal parameters.

The book presents problems related to traditional methods of synthesis and analysis of the main digital signal processing operations. It also examines problems related to modern methods of robust signal processing in noise, with a focus on the generalized approach to signal processing in noise under coherent filtering. In addition, the book puts forth a new problem statement and new methods to solve problems of adaptation and control by functioning processes. Taking a systems approach to designing complex radar systems, it offers readers guidance in solving optimization problems.

Organized into three parts, the book first discusses the main design principles of the modern robust digital signal processing algorithms used in complex radar systems. The second part covers the main principles of computer system design for these algorithms and provides real-world examples of systems. The third part deals with experimental measurements of the main statistical parameters of stochastic processes. It also defines their estimations for robust signal processing in complex radar systems.

Written by an internationally recognized professor and expert in signal processing, this book summarizes investigations carried out over the past 30 years. It supplies practitioners, researchers, and students with general principles for designing the robust digital signal processing algorithms employed by complex radar systems.

From reader reviews:

Howard Martinez:

Reading a book can be one of a lot of task that everyone in the world enjoys. Do you like reading book so. There are a lot of reasons why people love it. First reading a e-book will give you a lot of new details. When you read a reserve you will get new information since book is one of various ways to share the information or maybe their idea. Second, examining a book will make you actually more imaginative. When you examining a book especially fiction book the author will bring that you imagine the story how the character types do it anything. Third, you may share your knowledge to others. When you read this Signal Processing in Radar Systems, you could tells your family, friends and soon about yours guide. Your knowledge can inspire average, make them reading a book.

William Marquis:

Reading a book tends to be new life style on this era globalization. With looking at you can get a lot of information which will give you benefit in your life. Having book everyone in this world can share their idea. Books can also inspire a lot of people. A great deal of author can inspire all their reader with their story as well as their experience. Not only the storyplot that share in the textbooks. But also they write about the knowledge about something that you need illustration. How to get the good score toefl, or how to teach your kids, there are many kinds of book that exist now. The authors nowadays always try to improve their expertise in writing, they also doing some exploration before they write to the book. One of them is this Signal Processing in Radar Systems.

Larry Cain:

In this time globalization it is important to someone to get information. The information will make someone to understand the condition of the world. The condition of the world makes the information much easier to share. You can find a lot of personal references to get information example: internet, newspapers, book, and soon. You will observe that now, a lot of publisher that print many kinds of book. Typically the book that recommended to you personally is Signal Processing in Radar Systems this reserve consist a lot of the information on the condition of this world now. This book was represented how can the world has grown up. The terminology styles that writer use for explain it is easy to understand. The particular writer made some investigation when he makes this book. Honestly, that is why this book appropriate all of you.

John Johnson:

Reading a guide make you to get more knowledge from that. You can take knowledge and information from the book. Book is composed or printed or outlined from each source which filled update of news. Within this modern era like now, many ways to get information are available for anyone. From media social just like newspaper, magazines, science reserve, encyclopedia, reference book, fresh and comic. You can add your understanding by that book. Do you want to spend your spare time to open your book? Or just seeking the Signal Processing in Radar Systems when you desired it?
