Cardiac Imaging Cases (Cases in Radiology) Charles White, Joseph Chen

This easy-to-use, clinically oriented learning guide presents 115 unique cases that cover the scope of cardiac imaging, including congenital, ischemic, myocardial, valvular, and pericardial heart disease, as well as postintervention complications. Given the standard format of problem and solution, each case is structured for effective review and learning for both the resident-in-training and the experienced clinician. Cases are categorized by section: the first encompasses a brief review of basic anatomy, and subsequent sections are divided by disease category. Featuring over 440 images and accompanied by brief yet informative discussions, *Cardiac Imaging Cases* is the ideal resource and reference guide for anyone in the field of cardiovascular radiology. Also available as an app for iPad on the Apple iTunes store.
