Cottonwood and the River of Time: On Trees, Evolution, and Society Reinhard Stettler

Cottonwood and the River of Time looks at some of the approaches scientists have used to unravel the puzzles of the natural world. With a lifetime of work in forestry and genetics to guide him, Reinhard Stettler celebrates both what has been learned and what still remains a mystery as he examines not only cottonwoods but also trees more generally, their evolution, and their relationship to society.

Cottonwoods flourish on the verge, near streams and rivers. Their life cycle is closely attuned to the river's natural dynamics. An ever-changing floodplain keeps generating new opportunities for these pioneers to settle and prepare the ground for new species. Perpetual change is the story of cottonwoods -- but in a broader sense, the story of all trees and all kinds of life. Through the long parade of generation after generation, as rivers meander and glaciers advance and retreat, trees have adapted and persisted, some for thousands of years. How do they do this? And more urgently, what lessons can we learn from the study of trees to preserve and manage our forests for an uncertain future?

In his search for answers, Stettler moves from the floodplain of a West Cascade river, where seedlings compete for a foothold, to mountain slopes, where aspens reveal their genetic differences in colorful displays; from the workshops of Renaissance artists who painted their masterpieces on poplar to labs where geneticists have recently succeeded in sequencing a cottonwood's genome; from the intensively cultivated tree plantations along the Columbia to old-growth forests challenged by global warming.

Natural selection and adaptation, the comparable advantages and disadvantages of sexual versus asexual reproduction, the history of plant domestication, and the purposes, risks, and potential benefits of genetic engineering are a few of the many chapters in this story. By offering lessons in how nature works, as well as how science can help us understand it, *Cottonwood and the River of Time* illuminates connections between the physical, biological, and social worlds.

From reader reviews:

Kayla Merritt:

In this 21st centuries, people become competitive in most way. By being competitive currently, people have do something to make them survives, being in the middle of typically the crowded place and notice by means of surrounding. One thing that occasionally many people have underestimated the item for a while is reading. Yep, by reading a reserve your ability to survive enhance then having chance to stay than other is high. For you personally who want to start reading some sort of book, we give you this Cottonwood and the River of Time: On Trees, Evolution, and Society book as starter and daily reading e-book. Why, because this book is greater than just a book.

Bobby Hall:

As people who live in the actual modest era should be upgrade about what going on or info even knowledge to make these individuals keep up with the era which can be always change and make progress. Some of you maybe will certainly update themselves by examining books. It is a good choice for you but the problems coming to an individual is you don't know which you should start with. This Cottonwood and the River of Time: On Trees, Evolution, and Society is our recommendation to cause you to keep up with the world. Why, since this book serves what you want and wish in this era.

Walter Crouse:

Nowadays reading books become more than want or need but also turn into a life style. This reading behavior give you lot of advantages. Advantages you got of course the knowledge the particular information inside the book that improve your knowledge and information. The information you get based on what kind of publication you read, if you want send more knowledge just go with training books but if you want really feel happy read one having theme for entertaining including comic or novel. The Cottonwood and the River of Time: On Trees, Evolution, and Society is kind of guide which is giving the reader unstable experience.

Paige Robinson:

What is your hobby? Have you heard that question when you got scholars? We believe that that issue was given by teacher for their students. Many kinds of hobby, Every person has different hobby. And you know that little person like reading or as reading become their hobby. You need to know that reading is very important as well as book as to be the factor. Book is important thing to incorporate you knowledge, except your own personal teacher or lecturer. You get good news or update regarding something by book. Numerous books that can you choose to use be your object. One of them are these claims Cottonwood and the River of Time: On Trees, Evolution, and Society.
