Retail Category Management: Decision Support Systems for Assortment, Shelf Space, Inventory and Price Planning (Lecture Notes in Economics and Mathematical Systems) Alexander Hübner

Retail shelf management means cost-efficiently aligning retail operations with consumer demand. As consumers expect high product availability and low prices, and retailers are constantly increasing product variety and striving towards high service levels, the complexity of managing retail business and its operations is growing enormously. Retailers need to match consumer demand with shelf supply by balancing variety (number of products) and service levels (number of items of a product), and by optimizing demand and profit through carefully calibrated prices. As a result the core strategic decisions a retailer must make involve assortment sizes, shelf space assignment and pricing levels. Rigorous quantitative methods have emerged as the most promising solution to this problem. The individual chapters in this book therefore focus on three areas: (1) combining assortment and shelf space planning, (2) providing efficient decision support systems for practically relevant problem sizes, and (3) integrating inventory and price optimization into shelf management.

From reader reviews:

Warren Damron:

Why don't make it to be your habit? Right now, try to ready your time to do the important take action, like looking for your favorite guide and reading a book. Beside you can solve your condition; you can add your knowledge by the book entitled Retail Category Management: Decision Support Systems for Assortment, Shelf Space, Inventory and Price Planning (Lecture Notes in Economics and Mathematical Systems). Try to make book Retail Category Management: Decision Support Systems for Assortment, Shelf Space, Inventory and Price Planning (Lecture Notes in Economics and Mathematical Systems) as your friend. It means that it can for being your friend when you sense alone and beside those of course make you smarter than before. Yeah, it is very fortunated in your case. The book makes you a lot more confidence because you can know everything by the book. So , let us make new experience in addition to knowledge with this book.

Susan Rooks:

Book is to be different for every single grade. Book for children until finally adult are different content. To be sure that book is very important for people. The book Retail Category Management: Decision Support Systems for Assortment, Shelf Space, Inventory and Price Planning (Lecture Notes in Economics and Mathematical Systems) has been making you to know about other expertise and of course you can take more information. It doesn't matter what advantages for you. The guide Retail Category Management: Decision Support Systems for Assortment, Shelf Space, Inventory and Price Planning (Lecture Notes in Economics and Mathematical Systems) is not only giving you far more new information but also to become your friend when you experience bored. You can spend your spend time to read your publication. Try to make relationship together with the book Retail Category Management: Decision Support Systems for Assortment, Shelf Space, Inventory and Price Planning (Lecture Notes in Economics and Mathematical Systems). You never experience lose out for everything should you read some books.

Jose Brummitt:

The book Retail Category Management: Decision Support Systems for Assortment, Shelf Space, Inventory and Price Planning (Lecture Notes in Economics and Mathematical Systems) has a lot of information on it. So when you read this book you can get a lot of help. The book was authored by the very famous author. The writer makes some research before write this book. This kind of book very easy to read you can get the point easily after reading this book.

Christopher Parker:

Do you have something that you enjoy such as book? The book lovers usually prefer to select book like comic, quick story and the biggest one is novel. Now, why not hoping Retail Category Management: Decision Support Systems for Assortment, Shelf Space, Inventory and Price Planning (Lecture Notes in

Economics and Mathematical Systems) that give your fun preference will be satisfied simply by reading this book. Reading practice all over the world can be said as the method for people to know world much better then how they react when it comes to the world. It can't be stated constantly that reading addiction only for the geeky person but for all of you who wants to become success person. So , for all you who want to start studying as your good habit, you could pick Retail Category Management: Decision Support Systems for Assortment, Shelf Space, Inventory and Price Planning (Lecture Notes in Economics and Mathematical Systems) become your own personal starter.
