Francis Bacon

The Works of Francis Bacon (Cambridge Library Collection - Philosophy) Francis Bacon

Francis Bacon (1561-1626), the English philosopher, statesman and jurist, is best known for developing the empiricist method which forms the basis of modern science. Bacon's writings concentrated on philosophy and judicial reform. His most significant work is the *Instauratio Magna* comprising two parts - *The Advancement of Learning* and the *Novum Organum*. The first part is noteworthy as the first major philosophical work published in English (1605). James Spedding (1808-81) and his co-editors arranged this fourteen-volume edition, published in London between 1857 and 1874, not in chronological order but by subject matter, so that different volumes would appeal to different audiences. The material is divided into three parts: philosophy and general literature; legal works; and letters, speeches and tracts relating to politics. Volume 11, published in 1868, contains Bacon's political writings and letters from 1608 to 1613, including his treatise on the Irish plantations presented to King James I.
