## Ecological Modeling for Resource Management

This book was developed from a workshop on the "Effective Use of Ecological Modeling in Management," held in Oak Ridge, Tennessee, on October 23-26, 2000. The workshop was sponsored by the Department of Defense's (DoD's) Strategic Environmental Research and Development Program (SERDP), the Army Research Office, and the Engineering Research and Development Center of the Corps of Engineers as well as by the U. S. Department of Agriculture (USDA) Forest Service. It was hosted by the Department of Energy's (DOE's) Oak Ridge National Laboratory (ORNL). The organizing committee for the workshop included senior scientists from ORNL, the USDA Forest Service, and the U. S. Army Corps of Engineers (ACE). The members of the steering committee were John Barko, Paul Bradford, Bill Goran, Jeff Holland, Russell Harmon, and Mike Vasievich. They helped guide the workshop to a useful product by suggesting topics, speakers, and participants. Workshop attendees included senior ecological modelers within the Forest Service, DoD, other federal and state agencies, universities, and the private sector together with ecological-resource managers in the Forest Service, DoD, and other government and nongovernment agencies and organizations. The book never could have come to fruition without the dedicated efforts of Fred O'Hara in editing each of the chapters and making sure that the text was complete and accurate and that standard methods of expression and design were used in the text, references, tables, and figures. His careful attention to the details and to effective communication is appreciated. Many people helped in bringing the book to completion.
