Direct Methods for Sparse Linear Systems (Fundamentals of Algorithms) Timothy A. Davis

Fundamentals of Algorithms 2 Computational scientists often encounter problems requiring the solution of sparse systems of linear equations. Attacking these problems efficiently requires an in-depth knowledge of the underlying theory, algorithms, and data structures found in sparse matrix software libraries. Here, Davis presents the fundamentals of sparse matrix algorithms to provide the requisite background. The book includes CSparse, a concise downloadable sparse matrix package that illustrates the algorithms and theorems presented in the book and equips readers with the tools necessary to understand larger and more complex software packages. With a strong emphasis on MATLAB® and the C programming language, Direct Methods for Sparse Linear Systems equips readers with the working knowledge required to use sparse solver packages and write code to interface applications to those packages. The book also explains how MATLAB performs its sparse matrix computations. This invaluable book is essential to computational scientists and software developers who want to understand the theory and algorithms behind modern techniques used to solve large sparse linear systems. The book also serves as an excellent practical resource for students with an interest in combinatorial scientific computing. Preface; Chapter 1: Introduction; Chapter 2: Basic algorithms; Chapter 3: Solving triangular systems; Chapter 4: Cholesky factorization; Chapter 5: Orthogonal methods; Chapter 6: LU factorization; Chapter 7: Fill-reducing orderings; Chapter 8: Solving sparse linear systems; Chapter 9: CSparse; Chapter 10: Sparse matrices in MATLAB; Appendix: Basics of the C programming language; Bibliography; Index. "Overall, the book is magnificent. It fills a long-felt need for an accessible textbook on modern sparse direct methods. Its choice of scope is excellent.." John Gilbert, Professor, Department of Computer Science, University of California, Santa Barbara.

From reader reviews:

Walter McBride:

The guide untitled Direct Methods for Sparse Linear Systems (Fundamentals of Algorithms) is the e-book that recommended to you to see. You can see the quality of the guide content that will be shown to an individual. The language that author use to explained their way of doing something is easily to understand. The author was did a lot of study when write the book, hence the information that they share for your requirements is absolutely accurate. You also can get the e-book of Direct Methods for Sparse Linear Systems (Fundamentals of Algorithms) from the publisher to make you much more enjoy free time.

Sylvia Dasilva:

Are you kind of occupied person, only have 10 or 15 minute in your day time to upgrading your mind proficiency or thinking skill also analytical thinking? Then you are experiencing problem with the book compared to can satisfy your limited time to read it because this time you only find e-book that need more time to be read. Direct Methods for Sparse Linear Systems (Fundamentals of Algorithms) can be your answer as it can be read by a person who have those short free time problems.

Patrick Cartwright:

In this time globalization it is important to someone to acquire information. The information will make a professional understand the condition of the world. The health of the world makes the information much easier to share. You can find a lot of sources to get information example: internet, paper, book, and soon. You will see that now, a lot of publisher which print many kinds of book. Typically the book that recommended to your account is Direct Methods for Sparse Linear Systems (Fundamentals of Algorithms) this e-book consist a lot of the information with the condition of this world now. That book was represented how do the world has grown up. The dialect styles that writer use to explain it is easy to understand. Typically the writer made some study when he makes this book. That's why this book suitable all of you.

Edwin Ball:

What is your hobby? Have you heard which question when you got scholars? We believe that that issue was given by teacher for their students. Many kinds of hobby, Every person has different hobby. And also you know that little person such as reading or as examining become their hobby. You need to know that reading is very important and book as to be the matter. Book is important thing to increase you knowledge, except your personal teacher or lecturer. You see good news or update with regards to something by book. Amount types of books that can you choose to use be your object. One of them is niagra Direct Methods for Sparse Linear Systems (Fundamentals of Algorithms).
