Towards the Multilingual Semantic Web: Principles, Methods and Applications

Towards the Multilingual Semantic Web: Principles, Methods and Applications

To date, the relation between multilingualism and the Semantic Web has not yet received enough attention in the research community. One major challenge for the Semantic Web community is to develop architectures, frameworks and systems that can help in overcoming national and language barriers, facilitating equal access to information produced in different cultures and languages. As such, this volume aims at documenting the state-of-the-art with regard to the vision of a Multilingual Semantic Web, in which semantic information will be accessible in and across multiple languages.

The Multilingual Semantic Web as envisioned in this volume will support the following functionalities: (1) responding to information needs in any language with regard to semantically structured data available on the Semantic Web and Linked Open Data (LOD) cloud, (2) verbalizing and accessing semantically structured data, ontologies or other conceptualizations in multiple languages, (3) harmonizing, integrating, aggregating, comparing and repurposing semantically structured data across languages and (4) aligning and reconciling ontologies or other conceptualizations across languages.

The volume is divided into three main sections: Principles, Methods and Applications. The section on “Principles” discusses models, architectures and methodologies that enrich the current Semantic Web architecture with features necessary to handle multiple languages. The section on “Methods” describes algorithms and approaches for solving key issues related to the construction of the Multilingual Semantic Web. The section on “Applications” describes the use of Multilingual Semantic Web based approaches in the context of several application domains.

This volume is essential reading for all academic and industrial researchers who want to embark on this new research field at the intersection of various research topics, including the Semantic Web, Linked Data, natural language processing, computational linguistics, terminology and information retrieval. It will also be of great interest to practitioners who are interested in re-examining their existing infrastructure and methodologies for handling multiple languages in Web applications or information retrieval systems.

From reader reviews:

Steven Zakrzewski:

Inside other case, little men and women like to read book Towards the Multilingual Semantic Web: Principles, Methods and Applications. You can choose the best book if you want reading a book. Providing we know about how is important a book Towards the Multilingual Semantic Web: Principles, Methods and Applications. You can add knowledge and of course you can around the world by the book. Absolutely right, simply because from book you can recognize everything! From your country right up until foreign or abroad you will end up known. About simple issue until wonderful thing it is possible to know that. In this era, we can open a book or searching by internet unit. It is called e-book. You may use it when you feel bored to go to the library. Let's study.

Dennis Scott:

In this 21st century, people become competitive in every way. By being competitive currently, people have do something to make these survives, being in the middle of the actual crowded place and notice simply by surrounding. One thing that sometimes many people have underestimated that for a while is reading. That's why, by reading a publication your ability to survive raise then having chance to stand up than other is high. For you who want to start reading any book, we give you this particular Towards the Multilingual Semantic Web: Principles, Methods and Applications book as basic and daily reading reserve. Why, because this book is greater than just a book.

Victor Banister:

Playing with family in the park, coming to see the marine world or hanging out with friends is thing that usually you will have done when you have spare time, then why you don't try thing that really opposite from that. One particular activity that make you not sensation tired but still relaxing, trilling like on roller coaster you already been ride on and with addition info. Even you love Towards the Multilingual Semantic Web: Principles, Methods and Applications, you could enjoy both. It is good combination right, you still want to miss it? What kind of hang type is it? Oh can occur its mind hangout people. What? Still don't get it, oh come on its named reading friends.

Harold Riggs:

Within this era which is the greater man or who has ability in doing something more are more important than other. Do you want to become one of it? It is just simple strategy to have that. What you should do is just spending your time not very much but quite enough to have a look at some books. One of several books in the top list in your reading list is actually Towards the Multilingual Semantic Web: Principles, Methods and Applications. This book which can be qualified as The Hungry Inclines can get you closer in turning into precious person. By looking up and review this guide you can get many advantages.
