# Biology of Plants

*Peter H. Raven, Ray F. Evert, Susan E. Eichhorn*

**Biology of Plants** Peter H. Raven, Ray F. Evert, Susan E. Eichhorn

This introduction to botany has been revised and completely reorganized - from the molecular and cellular through the whole organism to the ecosystem. The authors emphasize the relationships between growth and development, and structure and function, within the all-pervading themes of evolution and ecology. Features of the 6th edition include: coverage of diversity informed by recent sequencing studies and cladistic analyses; inclusion of current advances due to molecular techniques and biotechnology; and new material on ethnobotany and medicinal plants. There are various supplements for this product.
