Investigating Neurological Disease: Epidemiology for Clinical Neurology

Albert Hofman, Richard Mayeux

Investigating Neurological Disease: Epidemiology for Clinical Neurology Albert Hofman, Richard Mayeux

This concise but wide-ranging handbook reviews the epidemiology of neurological disease and the treatment and prognosis of all major diseases of the nervous system. Part One offers essential guidance for clinicians to quantitative methods in research, including genetic epidemiology, decision analysis, meta-analysis, outcomes research, and survival analysis. Thus it provides a good understanding of the evidence underlying clinical management. The second part is devoted to individual neurological diseases, covering etiology, diagnosis, prognosis, interventions, and implications for clinical practice. With contributions from leading international authorities, this book is an invaluable guide to clinical decision-making for neurologists and others involved in the management of neurological disease.
