There is something about ancient Egypt that sets it apart from any other civilization that has ever existed. Most of us can feel this when we contemplate the unique beauty of Egyptian art, its perfect symmetry, its sense of harmony and proportion. What was so special about Egypt that it was able to achieve such a rare kind of perfection? The attempt to answer this question will take us into realms far beyond conventional archaeological thinking.

Egyptian civilization flourished during the Bronze Age, at a time when a very different view of the world from our own prevailed. Ancient people saw the signature of a divine intelligence in the intricate design of nature and the complex web of relationships that sustained life on earth. It was the purpose of their art, myth and architecture to express this understanding and communicate it in a form that would elevate the mind to an apprehension of cosmic order.

If we find this difficult to grasp, it is because our minds have been shaped by a totally different outlook. The essential principles of the ancient world-view, including myth, symbolism and the idea of a transcendental intelligence, have lost their meaning for our own civilization. A quantum leap of the imagination is required to gain any insight into the mind of the ancient Egyptians.

In this book, the Seven Veils of Isis serve as a metaphor for a journey of discovery that will take us ever more deeply into the mysteries of this great civilization. As we proceed on our journey, we shall seek to draw aside each of the veils that hides the true face of Egypt from our curious gaze. Our enquiry will lead us progressively inwards, from the outermost layer, that of the land of Egypt itself, to the innermost, that of the mind which shaped this wondrous civilization.
